ARBRECCAN COMBING RAMS

SULLIVAN and SIMPSON beg to notify that the proprietors of the above Rams will be travelling their annual draft to their Northern stations, from Deniliquia, in June next. To any persons requiring them on the line of route they can deliver on the way.

The wool from the Warbreccan aheep has for years held a very high place, and has on several cocasions received first prize. It has, moreover, been highly commended by the Bradford Chamber of Commerce as a first-class combing wool.

wool.

The fleeces at the present Exhibitish carried away first and second prizes, and were also highly commended. They combine great weight and length of staple, with good quality, and are specially noted for evenness. The runs are hardy, of good sound constitution, never having been parapered or otherwise exceptionally treated.

About 500 will be for sale, and can be delivered in lots, either at Deniliquis or en route to the Darling Downs.

140,000 ACRES, subdivided into 40 Pad-3360 ACRES PURCHASED LAND.

B. D. MOREHEAD and CO. have been favoured with instructions from Donald Gunn, Eq., to offer for private SALE the FIKEDALE STATION, situated about 50 miles in a southerly direction from the Warwick Railway terminus, and in the unsettled district of Darling Downs, Ouensland.

terminus, and in the unsettled district of Darling Downs, Quenaland.

With the above station will be sold—

50,000 pure-bred merine sheep, more or less, all in paddocks, and all under 5 vears of age

600 head well-bred quiet cattle, more or less

Horses, stores, plant, rations, &c., do., 000 acres, more or less. Phecale contains an area of about 140,000 acres, more or less, every acres of which is available for grazing purposes, and for which the vendor holds an instrument of loase. Contained in the foregoing area are 3350 acres of purchased land. The general character of the country is lightly timbered, open undulating ridges, sound and healthy for sheep, and of great carrying capabilities. The whole of the country is permanently watered by never-falling creeks.

and personal management. Even before that time the Pikedale Sheep were noted for their superiority; and neither time nor trouble has been spared by the vendor in culting and classing them. The recult is a high standard of excellence.

Among the Sheep now on Pikedale is a small flock of imported Ewes and Rams, numbering, with their progeny, about 60 head. There is also a special stud flock of from 500 to 600 Ewes, and another stud flock of about 2500 Ewes. Exclusive of the Rams required for the Station, there are 1000 Rams from 1 to 3 years for eale. The average weight of the '74 cilp was 2 lbs. 10 or, per sheep, and he average price a fraction over (2s 64) two shillings and sixpence per lb. These facts the segents can sertify to, having cannined the chearing returns and the account sales. A reference to Stables' circulars will show that high pitces have been obtained for the "GUNN" brand for many years, and the agents would draw special attention to how little this brand suffered in comparison with others during the depression that existed in the wool market from 1867 to 1870. This fact was particularly referred to in a letter recently roceived by the vendor from his London brokers. The writer congratulated Mr. Gunn on the high character and uniform quality of hie wool, and strongly recommended him to continue his present system of breeding, adding that should another depression arise such wool as his (Mr. Gunn's) would suffer but little.

UATTLE.—The cattle are a very quist well-tred herd, and are all running in paddocks. They have been chiefly bred up from the original station milkers.

IMPROVEMENTS.—The dealing paddocks, a fact below the standard of the other improvements. The rest of the head station appointments and accessories are first-class and will remain the summary of the brown of the weather of the proprietor has been to spend money on Improvements of a reproductive nature, and for this purpose nither trouble nor expense has been spared. 26 BULLS.

Inbil Station, formerly the property of Mesers. C. and P., Lawless, is within the settled districts, and includes the runs formerly called Bunya Creek and Bind Flains, now consolidated and called Imbil. It also includes the run called Condangen.

The estimated area of Imbil is:—Lessed portion, 34 square miles; resumed portion, 34 square miles; and the area of Condangen, 25 square miles. The whole forms an excellent well-grassed cattle station, and is capable of carrying in all seasons at least 5000 head of cattle. It is splendidly watered by the Mary River, Condangen, Bunys; Yabber, Bells, and Bluff Creeks.

There are at present about 3000 head of cattle on the run (in good condition); 400 of these are heliers, now in the helier peddeck, which is capable of carrying, at all times double that number. There are on Condangen, Bun about 1800 head of bullocks, which have been separated from the other cattle and placed there to fatten; also, distring yards, &c.

There are also about 30 horses and 25 well-bred bulls on the run.

The cattle are sound and healthy, and perfectly, free

the run.

The catile are sound and healthy, and perfectly free

The IMPROVEMENTS consist of an excellent COT-TAGE, large STORE, COACH-HOUSE, STABLE, and all other requisite conveniences and outbuildings. In the violatity of the house there are very large and well-watered PADDOCKS.

Mr. CUNNERN moved the adjournment of the House to call attrained to the unswer given to his question having reference to the removal of the police magistrate at Wollombi. After having officiated there for twenty years, the police magistrate had been removed without any notice being given to the inhabitants; and the district was therefore test without a magistrate. It was arranged that the police magistrate at Ringleton should visit the Wollombi, Elleling, and Macdonald River; but, to do so, he would have to travel 15 miles. The old attangement by which the police magistrate at Singleton had been to travel 15 miles. The old attangement by which the police magistrate at Singleton had been done away with, and the police magistrate was also the Crown lands agent, and the district would be left without a Crown lands agent, and the district would be left without a Crown lands agent now. NATURALIZATION OF ALIENS.

pivileges of the anteral born.

Mr. JACOB had voted has sersion against the second reading of this bill; but as there was then a strong feeling in its favour, he did not propose now to vote against the second reading. He would, however, when the bill was in committee propose some amendments which, he thought, should be imported into it. The mover had said that an alien might become naturalized the day after he committee the colony. That was not the case. He might apply for a certificate, setting forth the reasons for his application; but before granting the application, the Governor had to make full inquiries into the case, and he astisfied that it would be proper to grant the occificate. He did not think there could be any ediportion to a person being naturalized in this way, due precaution being taken to see that the person was likely to be a resident of the country, and he did not think there could be any ediportion to be resident to the country, and he did not this way, due precaution being taken to see that the person was likely to be a resident of the country, and he did not this way, due precaution should be placed in the way of his settlement here. [Mr. ROBERTSON: Hear, hear.] Now the honmenter in his bill, though saying that he was not wedded to the particular time, provided that an alien should be office years in the colony before being entitled to litters of naturalization. By this bill those to be naturalized would be placed in a better position than those already naturalized, and it would really bring into existence two classes of naturalized by the provided the best of the property were missed. It "Commencement and short title;" 2," Repected of 11 Vic. No. 30 and 17 Vio. No. §;", and 3, "Capacity of aliens as to real and personal property" were prevent.

parted. Clause 4, "Alien not entitled to a mixed jury," was Clause 4, "Alien not entitled to a mixed jury," was proposed.

Nr. ALLEN thought this clause was scarcely necessary, because it was the law at the present time.

The question that the clause as read stand part of the bil was put and negatived on division by 19 to 17.

Claure 5. "An alien who has resided in New South Wales for a term of not less than fire years, and who intends, when naturalized, to reside in the said colony, near apply to the Governor for a certificate of naturalization. The applicant shall produce in support of his application his own statutory declaration, stating his name, ago, birthplace, occupation, and residence, also a like declaration of some other person as to the applicant's term of residence within the said colony, and give such turther evidence of the completion by him of the said term of residence and of his intention to reside in the colony, as the Governor may require, who, if satisfied with the evidence adduced, shall take the applicant's case into consideration, and may, with or without a seigning any reason, give or withhold a certificate, as he thinks most conductive to the public good. And no appeal shall lie from his decision; but no ench certificate shall have any sided until the applicant has taken the cath of allegiance hardnesser preceived."

He moved that the blank be filled up by the insertion of the word "one."

Mr. R. PORSTER thought, if they desired to extend these privileges to altens, they ought to be as liberal as possible, so that the moment a foreigner arriving here to colony h, could obtain a certificate of naturalization.

Mr. ROBERTSON said hen, members would be avere that at the present time under the law a foreigner arriving here could be naturalized at once. (Hear, bran.) He thought that the five years' residence condition in the clause was far too long. (Hear, hear.) While a foreigner could at the present time be naturalized as soon as he arrived, he had not all the rights of a British subject. He thought there should be some moderate period of prubation, and he was inclined to the opinion that a year was long trough. As to the starm about foreigners coming here and being naturalized too speedily, hon, members must remember that this law did not make it fragerative on the clause provided that the Governor might, without giving

Ciausa S. "Naturalized allen may obtain certificate undarthis Act"—was emitted.

Cause 9 was proposed as follows:—

"Any alien woman married before the passing of this Act is any natural born or naturalized British subject, shall be deemed and taken to have been herself naturalized, and shall have and be deemed to have had all the rights and privileges of a natural born British subject within this colony, and every child of such mother of father, who during infancy has become resident with such unother or father in this colony, shall be deemed to be a naturalized British subject.

Nr. FIT ZPATHIGIT moved the omission of the words words were unnecessary, because it was ordinally intended that the provisions or this clause should extend to say anitural born or naturalized British subject.

The schedule was also agreed to.

Mr. GARBETT moved the insertion of the following clause as clause 8 of the bill:—" If within two years after any person shall have obtained a certificate of niteralization under this Act such person shall ocase to reside it with the colony, such certificate shall be null and void."

Mr. PARKKS asid such a provision would be entirely regiment the principle of the bill, the object of which was to make a licensable to become British subjects. When one are all the was raised to that position completely, he did not seen how that status could be taken from him on any such ground as his leaving one part of the British dominions.

Mr. GARBETT contouded that the clause he preposed only carried out the principle embodied in clause 8 of the Revisia Act.

Mr. WISDOM opposed the introduction of any such clause.

Mr. WieDOM opposed the introduction of any sanh Mr. JACOB contended that the clause of the English Act reforred to provided for the re-admission of a natural-torn British subject who had become an alien, which was a very different state of things from what the consulton one had to deal with. Twelve persons were fined, some 10z., and others 20z., for drunkrannes; and one was fined 40z., having been drunk and disorderly. James Maguire, 15, in addition to a fine for having been found drunk at 7 o'clock in the morning, was fined 10z. for using obscere languages; and McManly.

WATER POLICE COURT.

FRIDAY.

Before the Water Police Magistrate, with Mesers.
Lester and Hunt.

Sew rail persons were brought before the Court and fined for drunkenness.

William Hardy, 26, seaman of the Lothsir, was brought before the Court in custody of constable Haggerty, on warrant, charged with embezzling on the high sears quantity of confectionery, valued at about £5, part of the cargo of the riph Lothsir. Frisoner pleaded guilty. The cargo was broached shortly after the Lothsir left London. Prisoner was the boatewain of the ship, and the captain, Benjemin Orchard, said that he was the last person whom he should have expected to have committed upth an offence. The robbery having been committed by one who was an efficer of the ship was likely to have an evil influence on the crew. The Bench directed that the value of the able man further, that he should be imprisoned for three menths.

BUSHONS EMERT.—There was a number of cases on this sheet, which were variously disposed of. Robert Lamont, driver of cab 304, was fined 30s., with 5a. 5d. costs, in default seven days in gaol, for having charged as sum in access of his legal fine. On the information of impactor Seymour, William F. Tarrant and Henry Caston were fixed for breaches of the Corporation by-laws, the former in the sum of £2, with costs, and the latter £3, with costs. William Johnson was charged with having neglected to pay Robert Selby, driver of licensed van 133, his legal fare. Defendant was ordered to pay 10s., with 5a. costs, in default seven days in gaol Klizabeth Collier, brought up for having made use of threatening words, was remanded for a week for medical treatment—the being suspected, from her manner and appearance, that ahe was of unsound mind. Johnny Fiji, a black, sued Colin Thomson, who had been master of a ship in the pearl-shell sherry, for £47 8s. 8d., alleged to be due as wages. Complainant bad been in the defendant's employ for about three years, when there was owing to him about £90, of which he got £42. Defendant admitted the

liabment of sale-yards was absolutely necessary.

Mr. CAMPRELT, said that he had entered into a calculation respecting the revenue from the Melbourne was deriving a revenue of something like 174 per cent on the outlay. He believed that not only were eatile, absep, and horses charged fees, but dogs size that were sent for sale has to pay fees.

The MAYOR said that the Corporation must have power to charge fees on all stock brought into the city of Sydnay Mr. MAIDEN said that yards must be established, and, once established, their usefulness would grow every day. They would tend to concentrate business, and bring a greater number of people into the market. At present ihere was a monopoly in stock operations, and the established are contained to the market of the part of the people of the the market.

Mr. Clark has been considered the build and the whole question. As an instance of the benefits derrived by the concentration of trade, he referred to the exhabilatment of the fish market in Woolloomooloo, during the mayoralty of Aldeur an Chapman. The cost of the market was, he thought, £2300, and the last annual return was £550. At first only one man took his fish there, the others held aloci, but they soon found that double the prices were being obtained for the fish hold in the market, and in a month or six weeks all the extehers took their fish there.

Mr. Pirr said that if the Corporation did not erect yards, the six weeks all the retreet took their fish there.

Mr. Pirr said the tif the Corporation did not e

Mr. Prit said that if the Corporation did not erect yards, the agents would have to erect yards of their own in self-defence.

Mr. W. F. BUCHANAN said that if semething was not dene before the winter, the agents would run the risk of being summore before the Felica Court for crucity to animals. Last winter he saw beasts lying 4ad in the yards, and other stempting over them.

The MAYOR said it was a matter of surprise to him that the stockowners and ageats had not taken steps in this matter before. He had applied to Mr. Oatley, the inspector of the abattoirs, for a return of the number of animals slauphtered at the stabilishment, and had received from that gratteman the following statement as to the number of animals slauphtered at the statiotic during 1874:—Cattle, 39,810: aheep, 257,811: calves, 591; pigs, 17,285; lambs, 12. He had been informed by a gandleman of the present deputation that from 12,000 to 15,000 lambs were sold in 55 days every year. It was clear, from the return he had just seed, that a very large number of animals were alsughtered in Sydney, contrary to law. He thought a part of the Belmore Markets might be used for the sale of stock. A large part of the marks were covered, and fagged, and they were cantral. And the alsement could have the use of them on Tenedays and Fridays.

Several of the gantlemen present thought the Belmore Markets might be tune of, and arrangements were made for a virit to the place at a c'clock next Tucsday atterseen.

After some further discussion with regard to the proposed central sale-yards, the deputation thanhed the Mayor for his coursey, and withdraw.

"Whenever power shall be given by any Act to her Majesty or to the Governor of the colony, or to any officer or person to make appointments to any office or place, it shall, unless there are words to show a contrary intention, be intended that such a power shall be capable of being exercised from time to time as occasion may require, and that her said Majesty, and the said Governor or such officer or person shall have power to remove or suspend the person appointed, and to appoint permanently or temporarily, as the case may require, another person in his stead, or in the place of any deceased, sick, or absent holder of such appointment."

As to the necessity for increasing the number of Judges and slee for increasing their ralaries, I do not think there will be much difference of opinion, and it seems to me that if we are to follow the example of Victoria in this regard, we might well follow the example of Victoria in this regard, we might well follow the in proportionately increasing the salaries of the District Court Judges, and in providing a retiring pension for them. It is not easy to over-satimate the importance to the public of the work already confided to District Court Judges, and it seems to me that the same principles of returnerson apply to these Judges as to the Judges of the Supreme Court.

I am very loath to introduce into this letter a word affecting myself individually. But my learned friend has seen fit to step out of his way to reflect upon me in a manner which I can hardly be expected entirely to pass over. "I entertain no doubt." says my learned friend, what twey considerable difficulty would have been experienced in procuring for such an appointment" (i.e., the appointment of Acting Judge during the absence of Mr. Judice Checke) "the services of a person in whose learning and character the profession and the public would feel confide Checke "the services of a person in whose learning and manner which is the service of a person in whose learning and the sum of the service of the sum of the

In the Legislative Assembly, yesterday,
Minister, in answer to questions, stated:—1. That
the Government are aware that a toilbar on the Newtown railway-bridgs. Proclaimed in 1860, but abandened in 1864, has been revived by the present lessee,
efter permission was refused by the Government for
its re-establishment. 2. That they question as to the
improvement of wharf accommodation in the Sydney
harbour will receive the early attention of the Government. 3. That the boundaries of the new district
at Gunnedah have recently been approved, and that
the notification of the new Land Office? will be
gazetted when the necessary books shall be ready.
4. That the Foundling Institution was opened in May,
last year. Forty-one children have been admitt. 31
most of whom were in a moribund state when received.
Twenty-jour of these have died. The children, having
been in an unhealthy state when admitted to the above
institution, there has been a considerable amount of
ill-health. The names of the effice-bearers are:—
Patroness, the Hon. Lady Robinson: president, Mrs.
E. B. Parnell; hon. secretary. Mrs. Bensusan.

of the children were found on the door-step of the
institution; and one was born in the Infirmary. Pive
have been re-claimed by their friends. The institution is non-secturian. 5. That Mr. Lackoy will sllow
the member for Sydney East (Mr. Macintosh) to see
the papers and plans of the trial survey for the railway from Redfern to Circular Quay, but he declines
to lay they been decided upon. 6. That the proicted extension of the Great Southern Railway from
Wagga Wagga to Ablury and other works were nowtecaving the best attention of the Government, with
4 view to submitting same to Parliament next session.
7. That the Government propose to remove the present police magistra In the Legislative Assembly, yesterday, in answer to questions, stated :- 1. That The STRAKER reported receipt of a message from the overnor, signifying assent to the Temporary Supply II for April.

Mr. Robertson thought the hom, member we rather premature, especially as it was not so the that the arrangement would be permanent. He that would be made; the magistrate now at Wolfombi said he thought he could do the work.

The motion for the adjournment was negatived.

Mr. Robertson laid on the table of the Hoise papers relating to the case of Dr. Beer.

Mr. T. C. Dangan moved for a return showing the cost of the last general election, with statement of disbursements to individuals. Motion agreed to.

Mr. Camenon, on behalf of Mr. Dibbs, moved for return, showing in what Public schools religious in struction has been given by ministers of reigion, uprovided for by law. Motion agreed to.

The motion was agreed to, and the bill was resis upport.

The motion was agreed to, and the bill was read a second time.

The House went into committee on the bill. The bill was considered clause by clause. The 4th clause (for a mixed jury) was, after some debate, rejected. Clause 8, respecting certificate, was also mixed, and several amendments made in the next following clause. The bill was, in the end, reported to the House with amendments, and the report was slopied. On the motion of Mr. Bucharak the Marriage with Deceased Wife's Sister Legalising Bill was read a third time, and passed.

The adjourned debate on the motion for the second reading of the Dog Bill having been called on, Mr. Gannary opposed the second reading on the ground that the bill contained many very abbing provisions—such as were totally inconsistent with constitutional rights. He suggested that the bill to contain the second reading by a majority of 27 to 10.

Mr. Buchtanan addressed the Assembly, contesting that the interests of the people of New South Wals were centered in this appeal case in Mr. Joachim, and the rein.

Mr. S. C. Brown insisted that the Government could not be represented in this appeal, and wester to deal with the opinion lately given herein by the Attorney-General for the guidance of the Ministry.

Mr. W. Forsten denied the absolute furth of the legal maxim that in all cases counsel must of necessity represent one of the two parties immediately concerned. In interpleader cases, for example, such maxim did not hold good. The position of Crown counsel, in such an appeal case as this had a very considerable analogy with that necessarily taken up by a Judge. Considering the precedent clast by the Attorney-General, it was a perfectly reascastic conclusion that in all extraordinary cases like this such an intervention as now desired on behalf of the Government of the colony would be allowed by the Privy Council.

Mr. FARNELL said that the opinion of the Attorney-General was clearly adverse to the request of Masn. Mr Carthy and Robertson. His second opinion was not such as to justify the conclusion apparently strived at by the Colonial Tressurer.

Mr. STUART thought it an extremely fortunate circumstance that the final Court of Appeal (the Privy Council) was not, strictly speaking, a Cantol law, but rather a Court of ministed law and equity, is which justice was to be had. He knew himself of case in which the East India Company had been identification with either of the two parties in this case, and that interest the Privy Council and the Privy Council of the Privy Council of the Privy Council of the Privy Council of the properson of the Court of Appeal (the Privy Council of the Robertson of the Government in this case wallowed, on their petition, to be represented in a spend of the petition of the service of th

The House adjourned at 7 minutes past 11, and Tuesday next, at 4 p.m.

WHETHER Immigration should be carried of directly at the cost of the land, fund, or indi-rectly by granting land bonuses, is a question of considerable practical importance. Happing of far as our present guidance is concerned, it is not a matter of pure theory and speculating, insamuch as we already have practical experience to help us. Not much of our own experience, it may be admitted; for since the days when large land grants were given to capitalists as a bait to induce them to come out and settle in New South Wales, that come out and settle in New South water, un-method has not been adopted by us. But some of our neighbours, tempted perhaps by the Lovelty, have tried it, and we have the benefi-of their experience.

It is important, however, that we should It is important, however, that we should clearly see that whether we sell the land and with the proceeds import the immigrant, or whether we tell the immigrant to come and repay him in land the cost of his passage, in either case it is the land that pays for the passage. In the first place we realize on the land, and expend the money in covering the costs of transit; in the second case the immigrant advances the cost of transit, and recoups himself out of the land. So far, therefore, as the principle of making the land pay for labour is concerned, the two systems do not fundamentally differ, and the point to be considered is, which system has the greatest advantages in practice.

Earth-hunger is said to be one of the great causes that drives people from the over-peopled old world to new countries where acres are many and people are few, and it has, therefore, been thought that to hold up a grant of land at been thought that to hold up a grant of land at the end of his journey is a powerful temptation to an immigrant, and acts as backing up the seductions of the emigration agent. This, perhaps, may be partly true, although it by no means follows that a man will make a good colonist in proportion to his earth-hunger. It sometimes happens that men who desire frecholds most, know the least about them, and there is nerthans no class to whom the idea of frieholds most, know the least about them, and there is perhaps no class to whom the idea of sitting under his own vine and fig tree is more captivating than the city born workman, who neither knows how to plant, nor to train, nor to prune the said fig tree or vine when he comes into possession of the coveted opportanity. When we reward with land all immigrants who find their way here at their own cost, we have, of course, very little check over, the class of people that may come. Yet it, it,

the class of people that may come. Yet it is

for immigrants should be well the right class of in getting the right class of men, and it by no means follows that the possession of the necessary passage meney furnishes that guarantee. Of course it is a good thing in itself that the people who come should have enough to the fore to pay their way out, because this is some sort of an election that they have belonged to the incur way out, because this is some sort of an intimation that they have belonged to the frugal and thrifty class, and not to that class and their earnings weekly as fast as they get them, uncareful of the future. Moreover get them, uncareful of the future. Moreover, as every one knows who has practically studied the subject, land is of very little use without a little capital to begin upon, unless the new settler happens to be in a fortunate position for supporting himself for a little while otherwise supporting himself for a little while otherwise than from his land. There are many men in the colonies who have gone upon land with no capital to start with, but who have either applied to the colonies who have either the capital to start with, but who have either the capital to start with the capital t cspital to start with, but who have either earned a subsistence as carriers on the road, or by doing work for neighbouring proprietors, and have so gradually acquired an independence. But where this has not been possible, and the new settler has to support himself out of his own property, he has rally, at least, twelve months of hard work generally, as least, twelve months of hard work in which it is all outlay with very little return, and therefore, a land order has often proved a and the total delusion to men who have simply had enough money to bring themselves out. This has been found to be the case over and over again in land, and the consequence has been that the immigrant has found that his land order was the immigrant has found that his land order was worth to him simply what he could sell it for. These land orders consequently came into the market in large quantities; were all bought up by squatters, often at reduced rates, and were appropriated to free-selecting the water-front-ages of their runs. The scheme so far simply turned into a contrivance for enabling Crown lessees to purchase at the upset price and with-out competition the eyes of their runs.

Further, it must be remembered that the political organizations with funds at their command, to nominate for passages people who had no money of their own, and to get the land orders as their reimbursement; the consequence of which was that people arrived in the colony just as landless as if they had been brought out under the old system, while some abuses were developed which could not so easily have sprung up when the selection of immigrants rested entirely with the Government.

Having regard to these clearly proved facts, we think that experience clearly shows us that the best plan is for the Government to keep the immigration under its own control entirely and we are not surprised to find that our neighbours in Queensland are contemplating This will necessarily throw a very arduous duty upon the agent in the mother country, who selects and approves, and as we know too well he is exposed to a great deal of im-position. But still the mistakes and abuses which this system is liable are, on the whole less than that to which any substituted scheme is liable, and where we have only to choose the lesst of two evils, we must be content if we come a little short of perfection.

Is is no small recommendation to a direct immigration system under the immediate con-trol of a responsible Minister, that it simplifies matters. The land order scheme, under any method of managing it, immensely complicat that department is already overburdened with work, and in many respects greatly arrears. We have got quite enough enunglement with our free-selection system already, without superadding to it the further entanglement of a land order system. All the projected schemes, too, for increasing the land we in proportion to the length of the immiproduction and objectionable, as requiring proof of his residence; because as know by experience, all these claims are more or less backed up by declarations and affidavits, and these affidavits, as we know too well, are so many traps for falsehood. We cannot, therefore, be too particular in keeping our administration as simple as possible. We have already got far too complicated an amparatus of Government for his possible. We have already got far too compli-cated an apparatus of Government; for a little over half a million of people we have an a million of people we have an we machinery almost equal to do administrative machinery almost equal to do duty for ten times that number, and so far m multiplying departments and officials, and increasing inquisition in the people's private affairs, we ought, if we make any change at all, to move back in the direction of more

All the projects that have been proposed for compelling immigrants who come at our expense to remain in the colony are idle. The only way to bind people to this colony is to make them prosperous in the colony, and the way to do that is to free industry and to keep way to do that is to free industry and to keep taxation low—to let everybody have a fair taxation low—to let everybody have a fair scope for his ability and full protection in the enjoyment of the fruits of his industry. If we do not in that way succeed in attaching people to the soil, there is no other way in which we can do it. the same time. changes there are sure to be. There is not a single colony of the Australasian group which has not at some time or other parted with some patt of its population to neighbouring colonies. At the time of the first discovery of gold, all the colonies contributed largely to Victoria, which was then a general rendering the colonies. which was then a general rendezvous. Queens land, when it was started, drew very largely from New South Wales, and when the crisis came in Queensland many of its imported immigrants found their way south. The New Zealand gold-fields drew off population from all the colonies, and the Queensland gold-fields are at this time an attraction which is taking northward from all the colonies. No of us can expect to keep its population always within its own borders, and we must make up our minds to give and take to a certain extent. A certain per centage of all the immigrants brought at the public expense must be reckoned on as likely to move off at any attraction; but as a rule the major part of the immigration has remained in the colony to which it was first brought in the colony to which it was first brought. Families settle down, get attached to particular places, and are not disposed to go unless their condition becomes from any cause undesirable, and a change to a neighbouring colony would be an obvious improvement. At the same time immigrants who have once crossed the set, are always more or less migratory; men who have once loosed their moorings from the old country and made a journey of fifteen thousand miles, always think less afterwards of fresh changes, and an immigrant population ony to which it was first brought. bousand miles, always think less attorwards of fiesh changes, and an immigrant population not actually fastened on to the soil will, to the end of the chapter, be more or less movable; but that is a state of things that we must

does with the lives and liberties of those who are not less our fellow-citizens because they are accused of crimes—and with all the complex accused of crimes—and with all the complex and multifarious transactions of a population of 600,000 persons, which necessarily form the subject of investigation before our Courts, is of the deepest interest to all of us. No subject is or can be one of graver reproach to a British community than the nadequacy of its legal and judicial for the ordinary requirements of the people.

And one of the fairest and most conclusive tests of the degree of civilization which any society has reached, is furnished in its public provision for the satisfactory settlement of all controversies in the Civil, and the fair trial of all cases in the Criminal Courts. That community which, however lavish its ex-Inat community which, however lavish its ex-penditure may be upon the higher forms of culture, or upon primary instruction—however costly its public works and complete its muni-cipal system of government—neglects its first duty of solidly establishing and maintaining in vigour the department of public justice, is not entitled to take a prominent place among highly civilized peoples. And of all nations, it is the peculiar glory of our own to have always—and in no age more earnestly than in this—striven to make the administration of justice are complete. than in this—striven to make the administra-tion of justice as comprehensive and complete as possible, by the exercise of a wise liberality and extraordinary care in the selection of com-pretent men of high character, great learning, and enjoying the confidence of the best of their professional brethren. In nothing is the example of England more worthy of our care-ful study and imitation than in its provision for judicial services. Pecuniary considerations there have little weight in any matters conthere have little weight in any matters concerning the effectual discharge of the highest of all public duties—the judicial determina tion of all questions civil and criminal which come before the Tribunals.

In the bill now before the Legislative

Assembly to increase the number of Judges of the Supreme Court to five, and to make further provision in reference to their salaries and pensions, the Government are trying to and pensions, the Government are trying to keep pace with the ordinary development of the community, and are apparently doing no more than what has become absolutely neces-sary by the advancement of the colony, and the consequently increased business of the Courts. As the ATTORNEY-GENERAL has clearly set forth in his minute to the MINISTER OF JUSTICE, forwarding the draft of the bill now before Parliament, and which was published in these columns on Friday, the extension of the circuits of the Supreme Court to numerous and distant portions of the colony, involving long and laborious journeys, and considerable periods of absence from the metropolis, abundantly establish the immediate necessity of the appointment of an additional Judge Even with the arrangement recently mad Even with the arrangement recently made for the conduct of the business on Circuit, by the special appointment of two such able and experienced men as Sir William MANNING and Sir ALFRED STEPHEN, there has been some dissatisfaction expressed in various quarters that the Civil business of the Courts was not, and seemingly could not be, And the ATTORNEY-GENERAL himself confesses that he was unable to secure what he represents as essential for various purposes in the Common Law, Equity, and other Jurisdictions of the Supreme Court—the constant presence in Sydney of one Judge of the Supreme Court. It is generally understood that the present Judges of the Supreme Court felt so strongly the inadequacy of the existing judicial staff to the increased labour imposed upon the Court by strongly the establishment of new circuits, that the protested, as far as they were able, against the two latest of these arrangements; and that some considerable time since, when Mr. Justice CHEEKE was in the colony, and before he asked for leave, they urged in strong terms their physical incapacity to perform more work than that then imposed upon them. But the fact of their inability to deal with the business is patent. At present there are only two Judges in

Sydney. His Honor Mr. Justice HARGRAVE is on his way home from one of the assize towns scarcely fifty miles from the borders of Victoria, and will not reach here until after the busing and with not reach acre until after the distinction of the two Courts sitting at Nisi Prius, which sittings commence on Monday, will have been entered upon. Within a few days of his arrival the Criminal Court at Darlinghurst will open, and either he must take that Court, or one of the Jury Courts must be closed. Mr. Justice HARGRAVE has not only the Equity Courts, and all Ecclesiastical, Insolvency, and Lunacy matters, as well as Chamber business to attend to, but he has also the Divorce Court to preside over, and the Windingary Act to reside over, and the Windingary Act to reside over the windingary and the court of the windingary and the second court of the windingary and the second court of the windingary and the second court of the windingary and w side over, and the Winding-up Act to ad-minister as the Primary Judge in Equity. Unless, therefore, immediate relief be given to the Supreme Court, the business must be brought to a standstill. With the objections brought to a standstill. With the objections of the ATTORNEY GENERAL to temporary appointments to judicial offices, every lover of constitutional action will deeply sympathics. The present Judges of the Supreme Court would be entitled to remonto judicial system of a principle so novel and so objectionable. If the effect of raising the salaries of the Judges will be to enable the Government to obtain the services of the best men-and if such services cannot be otherwise procured—the Legislature will not exercise a wise discretion in hesitating to vote such salaries. It is not surely a desirable state of things to make the acceptance of the highest judicial offices a costly sacrifice; to compel a man who, at the end of a laborious professional career, finds himself in the possession of a splendid income to give up one-third or one-half of it if he aspires to the highest honours of his profession.

THE COASTING TRADE BETWEEN SYDNEY AND NEWCASTLE.—A meeting of owners of vessels engaged in the coasting trade between Sydney and Newcastle was held yesterday afternoon, in the Chamber of Commerce, Exchange. The object was "to consider a matter of great importance affecting their interests." The chair was occupied by Mr. William Speer. The chairman said that the matter which they had met together to consider was the want of proper facilities for loading the coasters at the port of Newcastle. Some time ago they had had the privilege of using two cranes; but this privilege had been withdrawn by the Government. Through this action they were put to very much inconvenience, and had to wait frequently a long time before they could have an opportunity of loading with coal for Sydney. They could not make anything like the number of tirps between Newcastle and Sydney that they would be able to make if the Government were to allow them proper facilities. This was a matter in which the people of Newcastle were themselves interested. If inclinities were not given to consters at that port, they would find the coasters going to Wollongong, Buili, and other places for coal. Another consequence would be that the price of coal in Sydney would render them which they would suggest that they should wait upon the Minister for Works, Mr. Lackey, and make a strong remonstrance on the subject of the present state of things He believed that the members of the would suggest that they should wait upon the Minister for Works, Mr. Lackey, and make a strong remonstrance on the subject of the present state of things He believed that the members of the Music proper means for loading; but under propented the matter to him. Royal Society.—From the want of suitable stoommodation, the Royal Society of New South Wales has long experienced great inconvenience, and even loss. Of late years its meetings have been held at the Chamber's Commerce, which, however well adapted for justified accommodation for the purposes of a selectific society. This want of suitable premises has been a source of great, jain and regret to the council and members of the society, and it has been plainly seen that the absence of a "local babitation" has acted very prejudicially to the interests of the rociety, and its much curtailed its influence. Quite recently, however, the society has had the good fortune to secure more appropriate accommodation, by "arangement with the Academy of Art, in the building formerly known as Clark's Asembly Rooms, which are now being completely repaired and nawly decorated throughout for the reception of the academy. The accommodation secured by the Royal Society includes the use of the large hall for the ordinary monthly meetings, and the possession of a smaller separate own for the purposes of a library and board-com, and the one keeping of other property belonging to the society. It is intended to inaugurate the new premises of the society on the evening of Wednesday, May 12, when the Rev. W. B. Clarke, M.A., F.G.S., will deliver the usual anniversary address.

The Import markets have undergone a very

The Import markets have undergone a very noticeable change during the past week, in consequence of the unprecedented arrival of seven ships from England, and one from New York, within five days. Such a quantity of goods coming to hand at once rendered buyers less disposed to operate, especially as many of them had bought to arrive by ships now in port. The changes in quotations of many

articles has been so sharp that it is at present impossible to fix a value. Breadstuffs have not altered in any way; sales light, and stocks ample. Candles have hardened; 93d. to 93d. has been paid for best. Coffee has not recovered the recent decline, and plantation cannot be quoted higher than 12d. Fruits of all kinds have been scarce, and several parcels have come here from Melbourne to meet trade demands. Fish is dull of sale, with a full stock. Groceries and oilmen's stores are nominal, as many were out of stock until the late arrivals came in. Liquors are in fair demand. Brandies are very firm, particularly best brands of case, Hennessy's selling at 32e, and Martell's at about 28s. Lounder rum wanted at 4s. 6d. on the spot; sales of Queensland at 2s. 2d. to 2s. 3d. Bulk ale is easier; best worth £7 15s. to £8; bottled is very dull at 5s. 9d. to 10s. Porter unaltered. There is a moderate demand for whisky. Naval stores move slowly, though like some other articles, the supply is at prosent limited. Tasmanian hops have been selling in small lots at about 28t. 1d., but a lower figure would be accepted for a parcel. Provisions are still very scarce, and command extreme prices. The rice market is quict at former quotations. Sugars are a little firmer, recent sales have been made privately at a slight advance. Teas are inactive; no purchases worth mentioning have transpired during the week. There is a great scarcity of aromatic tobacc; no imported in first hands. Our usual monthly market review will be published on Friday next for the San Francisco mail. By that time prices will have settled.

STOCK AND STATION REPORTS.

SULLIVAR AND SHAPON -- Estitions: We have had some for this week for both sheep and extic stations, but no business except sending a purchaser out to inspect a sheep promy. Cattie: The supply brought to the yards for sale by such quite as many as was required, and the quality of some of twere very good, for which the biddings were spirited, and the the week sales went off well at ratio outlangual trains.

Cattle: The supply brought to the yeard a sneep property. Fall Cattle: The supply brought to the yeard for sale by saution was quite as many as was required, and the qualified for sale by saution was quite as many as was required, and the qualified, and during the week sales went off well at rates quite equal to last weeks. We quote best pers of bullocks worth 28 to 34 per 160 lbs; fair to good, 714 to 123; others in proportion. Our sales this week have bren 161 nows and bullocks (Mason's) at an average of 57 767. Fat Sheep: The market opened on Monday at a slight advantage of the sales upon all rold. This is only to be accounted for by the fact that the izes purchasers are fully supplied from flocks they have bought outside, and are therefore not purchasers to any gystaxtenet as present. The absence of country buyers also hados groat difference. We quote 56-16, we when worth 151 accounts of Masser, Jennings and Shanshan at 138 415, isle, on account of Masser, Jennings and Shanshan at 138 415, isle, on account of Masser, Jennings and Shanshan at 138 415, isle, on account of Masser, Jennings and Shanshan at 138 415, isle, on account of Masser, Jennings and Shanshan at 138 415, isle, on account of the same gentlemen 1058 ditto at 12a 1d. Store sheep: We have been inquires for young ewes in lamb, sline for large framed weekbars, but buyers are not incelled to give the priess saked hybriolours, so we have not concluded any sales this week. Store Cattle: We expect now that the late raise have been prietly requested here will be an increased demand for, 700 head, at Muswellbook, on Teseday Bexx.—April 30.

G. M. Pirr xan Sox.—Salistons: We have had several imprires for pastoral properties this week, and have placed one under offer to be inspected. The demand still continued for fanced in runs, but lew of these are in the market for sale. Fal Cattle: 130 yauded. Sales this week pasted of more prieze. One or two pastoral properties this week,

MIRACULOUS CURE OF ULCERATED SORES.

"Grimsbury, Benbury, 10th August, 1874.

"Dear Sir,—Leg to tender you my grateful thanks for the bonefit I have derived from taking your 'world-famed Blood Mixture." I had been in several hospitals for my complaints—ulcerated sorce—but without deriving any benefit, and had given up all hopes of getting oured. Some weeks ago I bought a small bottle of your 'Blood Mixture,' and since that time I have had six more, the effect of which has been miraculous.

"Yours faithfully,"

"London, S.R., 9th July, 1874.
"Sir,—I return my sincere thanks to you for the great
benefit I have derived by taking your celebrated
'Blood Mixture,' I will state my complaints to you.
I had an injured finger, and unfortunately, got it
poisuned, then it gradually became worse,
hiy arms, face, and body came out in pimples
and blotches, and could ecarcely stand on
my legs. However, I naw an advertisement
from you; I agreed, as a last resource, with
my wife, to try your Blood Mixture,' and, thank
God, the sacond day I felt relief, and in one week
the pimples began to die away; in three weeks I
went to work again.

"Yours truly,
"John Henderson,"

PISHOP'S CITRATE OF MAGNESIA.

ALFERD BISHOP, Manufacturing Chemist, 17, Speak's Fields, Mile End, New Town, London, N.E., respectfully reminds the wholesale and retail trade, both in Great Britain and abroad, that he originally invented and prepared Citrate of Magnesia since 1857, when it was first introduced. He has nover cased personally to superintend its manufacture; and the marked superiority of his brand over that of all the imitations in the market is admitted by all the largest buyers. The materials employed are aniformly of the highest quality; the granules are handsone in appearance and perfectly soluble, and the genuins preparation yields a draught which, as a refreshing asine medicine of peculiarly pleasant favour, is instantly distinguishable from the imitations.

Vice-Chancellor Sir W. PAOR Woop stated publicly
in Court that Dr. J. COLLIS BROWNE'S was undoubtedly tor
inventor of Chlorodyna, that the whole story of the defendant Freeman was deliberately untro, and he regretted to
eavy it had been sworn to.—Trime, July 13, 1864.

Dr. J. Collis Browne's Chlorodyna.—The Right Hon
Earl Russell communicated to the Colloge of Physician
and J. T. Davenport that he had received information to
the effect that the only remedy of any service in cholers was
Chlorodyna.—Soc Lanoar, December 31, 1864.

Dr. J. Collis Browne's Chlorodyne 's is prescribed by
scores of orthodox practitioners. Of course, it would not
be thus singularly popular did it not 'smpply a want and all
a place. "Munical Times, January 12, 1865.

Dr. J. Collis Browne's Chlorodyne is the best and mescorrisin remedy in cougha, colde, asthma, consumption
neuraligia, rheumatism, &c.

Dr. J. Collis Browne's Chlorodyne,—Caution.—Nonscenials without the words "Dr. J. Collis Browne's Chlorodyne" on the Government stamp. Overwhelming modical
testimony accompanies each bottle. Sols manufacturer,
J. T. Davenport, 23, Great Russell-street, Bloomabury,

In one or more lots, as subdivided, to suit purchasers.

RICHARDSON and WRENCH have received instructions to sell by public auction, at the Roems, Pitt-etreet, on FRIDAY, 7th May, at 11 o'clock, The above valuable suburban property, occupying the oboleest position in that favourite watering-place, BRIGHTON, MANLY BRAGH.

LOT 1 has 2051 feet frontage to Belgrave-stroet, and extends back to a road at the rear. On this lot is that REMARKABLY PRETTY AND MASSIVELY—BUILT STONE VILLA now occupied by the proprietor. It contains verandahs, hall, 6 rooms, kitchen, servants rooms, and numerous out-offices—the latter principally built of weatherboards. The grounds surrounding this residence are laid out with considerable taste, and comprise lowns, flower garden, shrubberies, &c. There is a vegetable gardon, yard. &c., at the rear. A dwarf stone wall and paliesde fonce divides this lot from the road.

LOTS 2 to 8 are very choice building sites, having each frontages of from 46 to 56 feet each to Belgrave-street. These eites consist of a suddivision of the orchard and garden grounds adjoining lot 1. Lots 69 and 61 are two corner sites, situated at the junction of Belgrave and Steinton stroets, immediately opposite the residence. They each have a frontage of 40 feet to the former, and 100 feet frontage to the latter road.

With regard to the position of this property, it will compare very favourably with the most valuable sites in this favourite watering place. It is but a few yards from the ocean basch, about five minutes' walk from the steamers' jetty, and while commanding extensive pleasing view, is well sheltered and charmingly secluded. Indeed, being an early selection, Underoilff is well known to rank without exception as the choicest property in every respect at Manly.

ARRISON, JONES, and DEVLIN have received instructions from Messrs. Hunt and Crawford to sell by public auction, at their Rooms, Bell'schambers, Pitt-street, Sydney, on WEDNESDAY, 26th May, 1875, at 12 o'clock.
Those magnificent Fattening Stations so favourably known in the Western Districts.

BURDENDA

consisting of the following blocks of country, viz., BURDENDA

BURGABADAH TABRATONG
situated on and having a frontage, of about 174 miles to the BOGAN RIVER, and having an estimated one of 60,000 across. There are several fine COWRILS on the run, which is considered one of the BEST WATERED and FATTENING RUNS in the Western Districts.

With this recilly choice run will be sold

12,000 mixed SHEEP, more or less.

(Classification will appear in a few days.)

The COUNTRY is chiefly MYALL, SALTBUSH, Yarran, and Belah Plains, with herbage and grasses of the inchest fattening description.

The IMPROVEMENTS consist of comfortable 6-roomed cottens of states also, shingled; stock and drafting yards, several out-estations; 4, 80, and 180 acre paddocks, dec. &c.

This station is so widely known as the very cream of this beautiful district, that comment from us is superfluous.

chair beautiful district, that comment from us is superlucors.

OBELA and
CHAIN OF PONDS,
forming a grand scope of about 42,000 acres of unsurpassed BREBUING COUNTEY, are situated near
OBLEY, and baving a frontage of about 13 miles
to the LITTLE RIVER; also watered by Vanndo
Wardong, Red Bank, and Chain of Ponds Orceks,
besides several large and never-failing springs, the
largest of which is situated in the middle of the
Chain of Ponds lock.

With this station, will be sold
6000 mixed SHEEP, more or less
(classification will appear in a few days)
200 head GATTLE, more or less,

200 head CATTLE, more or less,

The COUNTRY consists of sour d box ridges, apple tree
and yarran fists, with come ironbark and pine ridges.

The IMPROVEMENTS include comfortable dwellinghouse, nearly new, with 6 rooms, kitchen, servant's room,
dairy, store, harnese room, stables, &c.; garden, with choice
fruit trees; new woolshed, for fourteen shearers; huts,
wachpeol, several out-stations; paddocks of 6,12,200 nores;
two sheep unddocks, nearly new, 8000 acros.

This station is admirably adapted for either sheep
cattle, and is perhaps one of the best-watered runs in the
colony; and if bought with Burdenda, would be the most
complete and lucrative investment, as Burdenda would
fatten off the stock bred on Obella, such standing very high
for their respective qualities.

920 mixed sheep, 146 rams. There are also about 60 dairy cattle and a team of working bullecks, which may be taken at a valuation or rejected at option of purchaser.

The adaptability of this COUNTEY to wool-growing will be best shown by the average price of the C&W olip in London for the last four years, viz., about 164 per lb. in the grease, the weight of fleece being 5 be. The FAT SHEEP from this station have always commanded full market rates.

The Shrait rates.

The IMPECURENTS consist of comfortable house of rooms, bathroom pantry, garden in full bearing, kitch:n, servent's room, meat house, dairy, stable, and coachhouse, overseer's house, men's huis; hay, straw, and cart sheds; 2 grass paddocks, 400 acres each; 2 incerns and 1 hay paddock, 2 out-stations, huis (some shingled), 2 or 4 yards at each; 315 acres purchased land, 2000 acres conditionally purchased.

purchased.

To those on the look out for a comfortable home in a charming climate, coupled with a most lucrative employment, perhaps no chance like the present has offered itself, where the breeding of high class sheep may be carried on with the brightest prospects of amassing a large fortune, instances of which we have in the Bayleys', Cox', and others, of Mudgee and elsewhere, with the rare advantage of having such well-bred flooks to begin with.
